

REPLACEMENT AND INSTALLATION INSTRUCTIONS FOR NEW URETHANE BUSHING ASSEMBLIES

NEW ASSEMBLIES

1. Inspect to make certain all bushings are flush and fully seated against face side of coupling flange.
2. Install and align coupling within $\pm 1/2^\circ$.
3. Equipment is ready to run.

REPLACEMENT BUSHINGS

1. Remove old bushing and bearing assembly.
2. Press new bushing in place - bushing may be a loose slide fit due to cleaning hole when removing old assembly; this is acceptable.
3. Re-install and align coupling within $\pm 1/2^\circ$.
4. Equipment is ready to run.
